Setup Excel Text Translator

There are three ways to run Excel Text Translator:

1. Open Excel and one Workbook and then doubleclick the AddIn file. Then you have the ribbon bar of Excel Text Translator.
   This could be the right way, if you use the AddIn sporadically.

2. Open Excel, goto to the Options and choose AddIns and then Excel-AddIns to add the AddIn file to your AddIns. Then you will see the Excel Text Translator ribbon bar every time you use Excel

3. Press the windows button on your keyboard and type „%appdata%" .Then the explorer will open. Goto to MICROSOFT then to EXCEL an then to XLSTART. Copy the AddIn file in this folder. Please note: Excel has to be closed during this operation. Then you will see the Excel Text Translator ribbon bar every time you use Excel.
